

# INTO THE UNIVERSE

---

## EXTRATERRESTRIAL ACTIVITIES

---

The Collected Works  
of Gregge Tiffen

Metaphysics  
First Encounter Series  
No. 1 of 3

### **This Science is no fiction.**

There is no escaping the facts. Gregge Tiffen documents his experiences aboard space crafts with Master Commanders and their crews over an extended period of time. Tiffen indicated as long ago as 1974 that due to the continual increase in spacecraft activities it is more than likely we will have our own personal experiences to validate what otherwise constitutes a list of fascinating and incredulous considerations. Until such time, we expect *Into The Universe* will encourage a greater awareness and appreciation for the window Planet Earth provides for knowledge gathering activities to extraterrestrial visitors.

*Into The Universe* emits the power of extraterrestrial experiences that challenge the established order of speculation about life in outer space. It documents the means and the ability of that life to transport itself and to communicate with us in various ways. It also provides specific instructions in ways for us to protect ourselves from damage to our bodies and consciousness when in association with them.

**Gregge Tiffen** served in two wars and was a military officer when he decided to leave military life in search of answers to questions as a result of the life and deaths he witnessed on the battlefields. His search led him to the Far East in the late 1950's where he received intense training in mysticism and mystical Law. When he returned to the United States, he became a well-respected business consultant, lecturer, and teacher. His published works can be ordered through his publisher at [www.P-SystemsInc.com](http://www.P-SystemsInc.com).
